

PRODUCT SHEET

## What is the Ease2pay group?

The Ease2pay group offers an IoT smart activation and transaction platform complete with an integrated billing and payment system. Our platform enables service providers to offer innovative self-service facilities.

The Ease2pay group assists its providers with the development and improvement of self-service facilities and enables the development of brands. Ease2pay's platform is the solution for shared-use utilities or services.

The platform can be linked to upgrade existing shared-use facilities or applied to new facilities, saving service providers from having to develop a platform themselves.

## Which facilities can the Ease2pay Group offer?

The Ease2pay group provides electricity and other utilities to your clients on the go. We can supply temporary electricity to areas such as marinas, campsites, car parks, events (festivals, fairs, amusements), so that the end user can have direct and quick access at any time.

With customer specific energy portals, smartphone apps and flexible payment methods we take care of literally everything that is involved in the supply of energy.

We offer business as well as private market solutions that can be marketed under your own label or ours. Our electricity supply concepts enable your customers:

- to activate electricity and other utilities using their smartphone,
- gain real-time insight into their consumption,
- to receive customised bills,
- enjoy easy and quick payment possibilities.

### Security & Quality

ISO 27001 & 9001  
VPN & APN by KORE  
High security  
eSIM M2M  
European "Eichrecht"

Uptime 24/7  
Hardware independent  
Asset management  
AWS Cloud

### User-friendly

Apps and websites per user group  
Automatic reporting  
Real-time insights  
Management portals  
Multi utility

## How does the Ease2pay Platform work?

The Ease2pay platform is hosted in AWS and takes care of invoicing and activation of devices 24/7, all year round. Our eSims KORE provides the best connectivity worldwide automatically connecting to the strongest mobile network in the area.

Our platform operates independent from any network provider and communications are 100% secure using the latest security standards.

Ease2pay can connect to any of your devices using our own or third-party smart metering controllers and operating via open protocols like OCPP, COSEM, DLMS, and several other proprietary protocols.

Our platform offers over 60 payment methods for end-users. Multi-language, multi-currency, and with local VAT regimes.

In addition, it has user-friendly applications for IOS and Android, custom-made or branded. The platform can provide RFID card functionality and smartphone apps can really deliver added value services such as real-time communication with the user, displaying prices, loyalty programs, and reservation.

## What are the benefits?

- Cost savings
- Modern & user-friendly interfaces
- Automated invoicing and prepaid wallets
- Multi-language platform
- Real-time insight
- Administrative analysis & monitoring

## Reference

“The Ease2pay group, the expert in pay-per-use software, has built a very powerful platform to handle payments.”

-Frederik Wiedei,  
Millie Operations & Payment Solutions

“With the Ease2pay platform, you can switch on and pay for electricity with the press of a button.”

-Jaap Schippers,  
E-Harbour Amsterdam
